

# MATILDA TRODIN

## EDUCATION

### MSc, Information Technology Engineering - Uppsala univerisity

5-year program where I've chosen Human-Computer Interaction as my major. The main focus is to learn about the bridge between the user and the system and how to create IT that is sustainable and usable.

## WORK EXPERIENCE

### System developer intern - Valtech

February 2020 - May 2020

As a system developer intern I worked in a team of 8 people to develop a mobile application for a small start-up client. The app was developed in React Native and I worked with both frontend and backend development.

### Design Intern - Mentimeter

June 2019 - August 2019

I spent the summer of 2019 working as a Design Intern for Mentimeter. I worked in a bigger project that aimed to make Mentimeter free for students. My role was to design and develop all new pages and assets that were needed. I worked mainly with React.js and CSS for development and Figma as a design tool.

### IT-support Technician - Uppsala university

February 2019 - February 2020

Along with my studies I worked extra in the Uppsala university IT-support which helps studends and employees with any type of IT-related problems that might arrive.

### Scrum master - Uppsala university

January 2018 - March 2018

When I took an advanced course in agile development, I worked extra as a scrum master for younger students at the program who were learning agile ways of working.

### Graphic Designer - Uppstuk

November 2017 - December 2018

As a consultant for Uppstuk I designed webpages and logotypes for clients around Uppsala, mostly small start-ups and organizations.

## NON-PROFIT EXPERIENCE

### Project manager - Pepp, Uppsala

August 2018 - June 2019

Pepp is a non-profit organization that works at a national level to get more women into the tech industry by organizing a mentoring program for young girls in high school. As a project manager, I organized Pepp's first year in Uppsala and had a team of 8 people that worked with me.

### Finalist - Female Digital Engineer

April 2019

I had the privilege of being chosen as one of 40 participants of the Female Digital Engineer program in the spring of 2019. I got chosen as one of the 10 finalists, which meant that I got to pitch a digital product that solves an identified issue in today's society, in front of an audience of corporate representatives,

## CONTACT DETAILS

- S:t Johannesgatan 30D  
752 33 Uppsala

## PROFILE

Ambitious and driven with a great interest for design and programming. I prefer working in a team but I like taking on tasks and challenges myself as well. I like solving problems and finding the best possible solution for them. I answer well to leadership that recognizes my strenghts and sees opportunites in my shortcomings.

## INTERESTS

- Front-end development
- Graphic Design
- UX
- System architecture
- Project management
